

OPERATIONS MANAGER - STATUS REPORT

August 13th, 2026

Treatment Plants

The treatment plants continue to meet constituent discharge requirements on a routine basis.

Collection System

Crews are continuing with regular operations, daily inspections of District lift stations, issuance of correction notices for repairs on private laterals, and inspections on all repairs. Throughout the month, collection staff inspected waterways and the district effluent outfall line after all rain events. In June the district hydraulically cleaned 5,927 feet of line, and televised 6,453 feet of line. In July district staff cleaned 15,411 and televised 10,381 feet of line.

Regulatory Compliance: District is maintaining a >90% compliance currently through the 2026 calendar year...i.e., < 2 SSO's, RWQCB Plant Discharge Requirements.

Facilities & Infrastructure

There have been no discharge violations due to equipment failure

Talking Points

- UC Fence has completed the new fences and gate at the Seeley Creek Plant in the areas affected by the hillside restoration and asphalt repair projects. Instrumentation crews will be adding hardware for an automatic gate.
- Tri State Water and Wastewater convention took place the week of August 3rd through 7th. Management, Operators, and Instrumentation Staff attended technical workshop and classes to further their education and gain CEU's for their certificates. It was a successful trip with many useful training and networking opportunities.
- Dawn and I had an opportunity to meet with State Water Resources Control Board's EOC. That is the department in charge of writing fines for the State Water Resources Control Board. Rick Dever was kind enough to arrange a surprise inspection of our District for us! We met with Ben Lettin, Executive Officer, and Jan Zimmerman, Assistant Executive Officer. We spent a few hours touring Huston and Seeley Creek Treatment Plants.
